Article Number: 110-95000

Mark 9 Stainless Steel - Tie Tensioning and Cut-Off Tool w/ Adjustable settings for all stainless steel ties

Base Data

Local Order Number MK9SST

Type MK9SST

Color Gray (GY)

Features and Benefits With its lightweight, ergonomic design, the MK9SST is an ideal tool for applying the MBT-series stainless steel cable ties. Although it is used for applying stainless steel ties, the MK9SST enables work to be carried out without operator fatigue and is easy on joints.

For easier handling the tensioning is fully adjustable by means of a quick two-level control with an additional fine setting. This avoids damage and constrictions to the bundled materials. The cable ties are cut off automatically flush with the head when the preset tensioning level has been reached.

Product Description Ranging from the high performance Mark 7 and Mark 9 series tools to pocket-sized twist tools, HellermannTyton offers a range of mechanical tools which can be used with any HellermannTyton cable tie. When using these tools, the cable tie is hand applied and then manually tensioned and cut-off, without the use of an extraneous power source.

Cable Tie Thickness max. 0.25 mm

Tension Setting Tools Adjustable

Short Description Mark 9 Stainless Steel - Tie Tensioning and Cut-Off Tool w/ Adjustable settings for all stainless steel ties

Product Dimensions

Cable Tie Width Max (imperial) 0.5 "

Cable Tie Width max. (metric) 16.0 mm
